## Laboratorio 1--Base de datos 1

## Paso 1: Ingresar a SSMS

	SQL Server	
Server type:	Database Engine	~
Server name:	MSI	~
Authentication:	Windows Authentication	~
User name:	MSI\VICTOR HUGO	V
Password:	Remember password	
	Connect Cancel Help Options >>	>

Paso 2: Ir al apartado de Security, login. Le damos click derecho a login, luego a new login para crear un nuevo usuario

Paso 3: Asignamos el usuario VictorBaseDeDatos1

Paso 4: Asignamos una nueva password

Paso 5: Asignamos los roles

Server Roles User Mapping Status	Server role is used to grant server-wide security privileges to a user.
	Server roles:    bulkadmin   dbcreator   diskadmin   processadmin   public   securityadmin   serveradmin   setupadmin   setupadmin   sysadmin   sysadmin

Paso 6: Habilitamos el login

Paso 7: Le damos en Ok

## Habilitamos el MODO Autenticación

Paso 1: Click derecho sobre la instancia e ingresamos a la página de propiedades

Paso 2: Ingresamos a la pestaña de seguridad y habilitamos SQL Server and Windows Authentication mode

Paso 3: Pulsamos el botón Ok, y nos pedirá reiniciar la aplicación

## Reiniciando el servidor SQL Server

Paso 1: Buscamos services en el buscador de Windows

Paso 2: Click derecho en el servicio y le damos a reiniciar o restart

Paso 3: Cerramos la conexión en SSMS

Paso 4: Conectamos con la opción de Database engine para el login

Paso 5: Hacemos el login con el usuario VictorBaseDeDatos1
